

Amendments to the Claims:

This listing of all pending claims (including withdrawn claims) will replace all prior versions, and listings, of claims in the application. Cancelled and not entered claims are indicated with claim number and status only. The claims show added text with underlining and deleted text with ~~strikethrough~~. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

Listing of Claims:

Claims 1-4 (Canceled)

5. (Currently Amended) ~~The~~A packaged commodity dispensing device ~~as claimed in claim 4, wherein a commodity supply opening is formed in an upper surface of the frame from or to which the packaged commodity dispensing machine is permitted to be inserted or removed~~ comprising:

a packaged commodity dispensing machine to dispense a packaged commodity;

a first frame having a first inlet and a first inner space, wherein the packaged commodity dispensing machine is detachably movable through the first inlet into a first position in the first inner space; and

a member to removably engage the packaged commodity dispensing machine with the first frame, when the packaged commodity dispensing machine is in the first position,

wherein the packaged commodity dispensing machine has an upper surface in which a first commodity supply opening is formed, and the first frame has an upper surface in which a second commodity supply opening is formed, the first commodity supply opening and the second commodity supply opening being in communication with each other when the machine is in the first position.

6. (Currently Amended) The packaged commodity dispensing device as claimed in claim 5, further comprising a commodity storing box having a bottom with an opening, which box is permitted to directly be fixed to is located above the upper surface of the first frame, and a bottom plate of the packaged commodity storing case is permitted to be inserted or removed in a horizontal direction which is provided at the bottom of the commodity storing box and is inserted in and withdrawn from the bottom of the commodity storing box,

wherein a commodity inside the commodity storing box is supplied to the packaged commodity dispensing machine via the opening in the commodity storing box, the first commodity supply opening and the second commodity supply opening, when the bottom plate is withdrawn from the bottom of the commodity storing box.

7. (Currently Amended) The packaged commodity dispensing device as claimed in claim 5, further comprising a commodity display which is ~~permitted to directly be fixed~~attached to the first frame.

8. (Currently Amended) The packaged commodity dispensing device as claimed in claim 5, further comprising:

a second frame having a second inlet and a second inner space, which second frame is detachably fixed on the upper surface of the first frame; and a commodity storing box having a bottom with an opening, which box is permitted to detachably fit into received in the second inner space through the second inlet of the second frame from forward; and a bottom plate which is provided at the bottom of the commodity storing box and is inserted in and withdrawn from the bottom of the commodity storing box, wherein a commodity inside the commodity storing box is supplied to the packaged commodity dispensing machine via the opening in the commodity box, the first commodity supply opening and the second commodity supply opening, when the bottom plate is withdrawn from the bottom of the commodity storing box.

9. (Currently Amended) The packaged commodity dispensing device as claimed in claim ~~5~~8, further comprising a third frame having a third inlet and a third inner space, which third frame is detachably fixed on the upper surface of the first frame; and a commodity display which is permitted to detachably fit into received in the third inner space through the third inlet of the third frame from forward.

10. (Currently Amended) The packaged commodity dispensing device as claimed in claim ~~4~~5, further comprising a base which is ~~permitted to detachably be fixed to a bottom of the first frame.~~

11. (Currently Amended) The packaged commodity dispensing device as claimed in claim ~~4~~5, further comprising a ~~clean~~container collection box which is ~~permitted to detachably fit into the first frame.~~

12. (Currently Amended) The packaged commodity dispensing device as claimed in claim 4~~10~~, wherein, the base is provided with a clean container collection box.

13. (Currently Amended) ~~The~~A packaged commodity dispensing device as claimed in claim 1, comprising:

a packaged commodity dispensing machine to dispense a packaged commodity;

a first frame having a first inlet and a first inner space, wherein the packaged commodity dispensing machine is detachably movable through the first inlet into a first position in the first inner space;

a member to removably engage the packaged commodity dispensing machine with the first frame, when the packaged commodity dispensing machine is in the first position,

wherein at least a front wall of the packaged commodity dispensing machine is formed with a transparent material, and an arch shaped wall portion ~~which protrudes forward~~ is formed at a central portion of the front wall in a width direction to protrude forward.

14. (Original) The packaged commodity dispensing device as claimed in claim 13, wherein protruding pieces are formed inward at both ends of the arch shaped wall portion of the packaged commodity dispensing machine, and a partition plate which removably fits between joint portions of the protruding portions and the arch shaped wall portion is provided.

15. (Original) The packaged commodity dispensing device as claimed in claim 14, wherein the partition plate is formed into a shape following an inner surface of the arch shaped wall portion.

16. (Original) The packaged commodity dispensing device as claimed in claim 15, further comprising a display member which is inserted between the partition plate and the arch shape wall portion.

17. (Previously Presented) The packaged commodity dispensing device as claimed in claim 14, further comprising a shelf at a middle portion in a height direction of the partition plate.

18. (Currently Amended) ~~The~~A packaged commodity dispensing device-as-claimed in claim 1,comprising:

a packaged commodity dispensing machine to dispense a package commodity;

a first frame having a first inlet and a first inner space, wherein the packaged commodity dispensing machine is detachably movable through the first inlet into a first position in the first inner space;

a member to removably engage the packaged commodity dispensing machine to the first frame, when the packaged commodity dispensing machine is in the first position,

wherein at least a front wall and a side wall of the packaged commodity dispensing machine are formed with a transparent material, and a corner at which the front wall meets the side wall is formed into a curved surface.

19. (Currently Amended) ~~The~~A packaged commodity dispensing device-as-claimed in claim 1,comprising:

a packaged commodity dispensing machine to dispense a packaged commodity;

a first frame having a first inlet and a first inner space, wherein the packaged commodity dispensing machine is detachably movable through the first inlet into a first position in the first inner space;

a member to removably engage the packaged commodity dispensing machine to the first frame, when the packaged commodity dispensing machine in the first inner space,

wherein an inspection hole is formed in a rear surface of the first frame.
